.

None

No suggestions

No suggestion

Study tour

Nothing

..

No suggestion

Good

NA

More interactive videos

Site visits and surveys should be more, scheduling of work may be developed so timings of college don't get late everyday and workload is efficiently managed
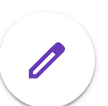

Introduce more site visits. Encouragement of students, less- aggressive behaviour of the teachers. Some faculty need to think about what they speak before saying anything and try to understand what the condition of student is. Most of the students were not attending due to the aggressive behaviour of the teachers. In terms of teaching, need to find more creative ways to encourage students to learn. Theory subjects were taught well during this semester. Work was done more in the online lectures rather than offline. The transition between online to offline lectures made students develop stress and resulted in late submissions.

Teaching online

More site visits are needed

Already Good..

Need more extra curricular activities like workshops and such. Study tours and site visits would be nice

Go on tours practically

Focusing on modern things, practical learning

No suggestion
It's excellent

Need more exposure

Study tours,material handling,practicals of material uses and all

More extra curricular activities

No comments

Need more students-teacher interaction

Suraj shinde

Tos faculty should be improved.
Want Hemant sir / Suraj sir.

Tos faculty should be improved.
Want Hemant sir / Suraj sir / venyela mam

Need of practicals and also games

There should really be a place where we train minds of architects by practical teaching and not only by commanding that do this,do that .....

Ok

More of digital equipment and playful designing

Just don't discourage student...else is fine

Giving more practical knowledge than theory knowledge
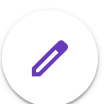

Less deadlines

Need holidays

Use of softwares should be promoted as it is what actually required in profession

Arrange more site visit than theory lecture.fun activity should be done while reaching.

Firstly, Teacher student bond needs to be developed.
Secondly, student needs to be taught more about practical knowledge and experience in real life after graduation.

Digital way of communication

*Need some of free days for non locals after semester
*if possible shuffle of division after every semester/Year to Explorer new nature & relation of SCOA friends & Faculty

Very Nicely done

Need site visits

should focus on softwares right from 3rd year

Giving enough sufficient time for submissions.

Study Tours should be taken every sem

Arranging study tours and site visits

Study Tour

Give more time for Bcm sheets
Ad Should be given more time duration

Study tour and site visits

No such suggestion

Nothing as such

Taking study tours

More site knowledge and market knowledge

Academic interestes can be created by having at least any site visit, workshops, study tour. Because there was not a single thing happened in last 4 semesters.

should give information about backlog submissions and any other notices on time.

Teachers must give their attention to each student and solve their problems. As its not happening like that. They are giving attention only to few students.
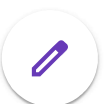

Teaching should be more effective and must give deep knowledge. Which is most important thing and I don't feel it's happening.

Activities like site visit and study tour

Hands on projects

Best

Use of Videos, showing examples, explaining the total quantum of requirements at the first session of the topic.

Extra curricular activities need to be more

More site visits, study tour needed.

Activities

No.

More live examples / real life demo of walls or doors or windows or wood than presentation teaching method

Nothing specific

Nothing

geafakgl

Shuffle the division as per the sem
Take more practical work

ITS NOT GOING TO BE FAST AND TRESSFULL. WE ARE FACCING TIME MANGEMNT TO COMPLETE THE ASSIGNMENT ON TIME

Need more field experience

Site visits

Treat them equally

Site tours

1)Use of English shud be made mandatory for teachers as it's convenient to students outside state
Use of Marathi during lectures shud be strictly prohibited as even a little use of Marathi is diverting focus
2) Teacher's must me made available online as in must be asked to reply students on having doubt for atleast 1 hr
3) Technical faculty of SCOA should have more members to help us get information about existing backlogs

Na

Needed more co curricular activities.

We have to go on site for practical knowledge

Taking exam online

Site visits and tours should happen every semester

the main focus should be on Trips.

Take more outdoor activities

By solving there problem and encourage them

1)Teacher should not demotivate students .
2)Working environment should not be stressful .
3) Good (MOTIVATING) working environment will help improving attendance.
4) If someone is trying with his/her full potential ,teachers should help him/her.

Students needed to be taken to site visit and given experience and Design in a subject where teacher needs to tell students about process of every design every levels , everything properly and manage time for projects in a good time so that students doesn't get burnt out and can handle this Assignment Properly

Offline

Teaching with more practically

No need

By conducting field visit, study tour, site visits and practical knowledge

Provide study tour for students

Arrange study tours for practical knowledge

Lectures can be taken on projector and explained with the help of powerpoint presentation. From this academic interest can be created in the students

The workshop for software and design Approach for course.

Less stressful environments

Implementation of One on one teaching method

No suggestions

More use of computer softwares can be good instead of hand drafted sheets.

No

Need more practical knowledge
