NA

Landscape Architecture should be for both semesters

Need to have paper for subjects like AGD and need to include viva for subjects like professional practice subject in addition to theory paper.

Topic should be related to current practices and need more exposure for students aslo need interactive sessions, studio exchange programs etc for betterment of students

Research in Architecture is found to be difficult for students in third year. Previous pattern had it in fourth year, which seems better as students were able to carry it forward in their ADP topic.

NA

More freedom can be given to give them liberty on creativity . Given benefits for participating in competitions or taking up a competition as a design project for the semester.

I am satisfied with current syllabus

-

I found that to be satisfactory.

Increase in site visits recommended

More practical approach is needed and weightage to work and proportionate marking needed to be checked , esp in history classes

Theory subjects like History must have written exam, students take it casually as only sessional marking is there.

No suggestions

Each subjects revision class will help students to clear their doubts.so it will be better to have revision class before examination schedule.

Assignment and outcomes should be clearly mentioned

Credits can be increased for theory subjects

No comments as I am new joining

No

Na

Theory subjects to have more credit and written exams

Theory papers required for some subjects

Can be more elaborate

Nothing

Need more practical knowledge from 2nd year

Site visits for subjects like BCM, for better understanding

Current market trends

Syllabus should be more practical oriented.. and theory subject should contain more credits..

More practical approach should be there. Compulsory Site visits should include and site visit reports can be considered as a submission part.

Fundamental aspects of learning to be stressed ,field studies to be taken in to account, time management and work ethics to be integrated in teaching learning process

Not much

Syllabus should be more inclusive of current practices and trends in Architectural field.

not much

I think need to add regular out door sketching activity for student .to enhance the sketching and visualization skills .

Involvement more in practical study- site visits, market surveys

Learning the subject at conceptual level instead of theoretical would make the students more confident and proactive . Application of the theoretical knowledge for their design projects can be made mandatory through time bound/esquee projects for all five years .
