STAKEHOLDER FEEDBACK REPORT

Stakeholders feedback was obtained through google forms at the end of academic year with an extensive range of questions on attendance, self-evaluation of their performance, teaching techniques and ambience centric queires for students. Stakeholders were also to comment on teaching methods, understanding of concept, learning value and use of ICT in teaching – learning process. The number of respondents from each class was chosen and confidentiality of student identity was maintained strictly. All faculty members were to share the feedback. All the recent graduated Alumni and internship employers were connected for the required feedback.

SCOA follows a students centric teaching learning system, hence this feedback was taken into consideration in improving the quality of teaching, satisfaction of students and their views on co-curricular activities, implementation. A suggestion was also collected in order to improve the academic interest within student.

Student feedback Analysis: 70-80 % students agreed that ambience of college is good but technological advancement and practical knowledge is to be more focused. Students requested for regular maintenance and cleanliness along with more hands –on Exercises.

Utilization: Responses indicated in increase of practical knowledge, additional to the increase in site visit there is increase in hands-on activities /workshops. Regular Cleanliness and maintainance of classrooms requested by students, instructions to follow the guidelines of cleanliness was issued.

Faculty feedback Analysis: 90% of teacher are agreed that college ambience is good, agreed with students' attentiveness, overall teaching methods and system of an institute. 20-30% teachers agreed that there are some improvements needed with respect to the infrastructure of college so that they can deliver better to institute and to the students.

Utilization: The digital infrastructure was maintained where necessary, Necessary arrangments are made for improvement and upgradation of Wifi system.

Employers feedback Analysis: 90 – 95 % of employers agreed that students from SCOA have a good design sense and understating, technical knowledge, communication skills, time management skills and team work spirits.

Alumni feedback: 40-50 % students agreed that system of college is good and nurturing the development. Many have suggested to include the future technology and use of Artificial Intelligence in education system.

Utilization: Employers and Alumni are satisfied with curriculum delivery and conduct of academics. Following the suggestions for use of upgraded technology in teaching, new value-added course will be introduced soon.

SCOA - First year Students feedback

My suggestion(s) for enhancing our learning experience and ambience of the institution

18 responses

More site visits and handson experience

Technical equipments such as projectors(AV), WiFi are way too old and provide poor output. These equipments must be replaced with new ones ASAP.

No natural light in studio

Above expectations

Partiality

Partiality should be avoided

good

-

It is good and it meets the expectations. But can improve on the interiors.

Nothing

No suggestions

Want better furniture in studio

..

Na

1.)Can arrange more number of guest lectures.

More number of site visits for practical learning shall be arranged

Thankyou

My suggestion to increase academic performance and ambience of the institution

21 responses

More softboards

Good ambience

Projectors in classroom and desktop for faculties

Regular upkeep of infrastructure and maintaining daily cleanliness

Good Internet/Wifi facility, PC and printers should be provided.

Should arrange lectures for faculty by experts to upgradation

Interdivisional design presentation of toppers may increase there motivation. More architectural design competition participation outside academics like NASA.

No suggestion

Ground floor light and ventilation to be improved by use of artificial lights and exhausts.

Nothing

No suggestions

No suggestion

Hands on experience and site visits

Improving academic performance and institutional ambience can involve streamlining administrative tasks. Organizing regular seminars or workshops, and promoting student-faculty interaction can stimulate intellectual growth and create a vibrant academic environment.

Good sufficient facilities , maybe can be improved over the time as technology keeps getting upgraded.

Ambience is Well maintained but can be upgrade with smaller changes. For academic performance more interactive sessions of senior-junior students and hands on workshops can be arranged.

Some efforts in response mechanism is appreciated in technical support

Conduct integrated studios

Provision of enough computers in staffroom is need

Need more smart class rooms

1. Spaces should be well ventilated & lighted, and cleaned regularly. 2. Develop and increase students Academic focus. 3 Make aware students about regular attendance.

-

No

--

Students should be encouraged to use advanced softwares from 2nd year, rather than traditional drafting till 3rd year

Good

NA

N/A

Give them Practical knowledge

O

More practical oriented syllabus should be more beneficial

Provide on site knowledge

Practical work

Would help students better if college taught relevant softwares as a course/add it to curriculum which are according to the industry trends to help them acquire better jobs and get ahead of their peers.

Introduce advance softwares for modelling and rendering to the students at early stage as that can help them mold and represent their ideas better, More efforts towards improving Digital Library can be taken.

More Focused on Professional Practice and industrial Software training.

It is very important to introduce on site knowledge for the budding architects

None

More focus on practical learning, business management and ethics, learning advance construction method and on site visit, more internship programmes to enhance professional and technical skill related to architecture and practice.
